## PROPOSED SANCTUARY REMODELING

In February 2011, the current capital improvement campaign called the 70/30 Project will be ending. The next major capital improvement project will focus on remodeling the sanctuary. The sanctuary was built in 1960 and there have been some modifications and improvements since that time. The pictures in this brochure show some of the details of this proposed remodeling plan. In addition to the pictures, the itemized list on the next page gives specific details of what is proposed in this remodeling project.

Over the next several months, the Trustees will be working with our architect to finalize these remodeling plans. At that time, the Trustees will be presenting these plans to the Administrative council, then to the congregation for approval. After congregation approval, a capital finance campaign will be conducted to fund this project.

*It is the current desire of Trustees to not borrow money for this project.*

If you would like to financially contribute to this project, you can begin immediately and do so at anytime. Please mark your gift "capital improvement."

If you desire to financially support this project, please give in addition to your regular operating budget contributions. We do not want to experience a decrease in our operating budget contributions for ministry and mission in order to fund this remodeling project.

If you have any questions about this exciting remodeling project, please contact the church office. I appreciate your prayers and support.

You are a wonderful congregation. It is a pleasure to be your pastor.

**Dr. Dean Posey**
